Work Experience

Student

Denver Universities Full Stack Web Development Program - Denver, CO

August 2023 to November 2023

Skills learned while I was a student In Denver Universities Full Stack Web Development course.

- Created full-stack single-page web applications using RESTful API routes and AJAX methods, and describe how front-end applications communicate with back-end applications and databases.
- Implemented structured and unstructured databases to convert static websites into dynamic websites that persist data.
- Built he communication skills and learned foundational computer-science knowledge.
- Applied the accepted and standard basics of social coding—including source control, issue tracking, and functional feedback—as part of a development community, while building an application.
- Demonstrated strong teamwork and project management skills as a collaborator and independent contributor during the development cycle of complex projects.

Tools that I worked with in course.

- HTML/CSS/GIT
- JavaScript
- Bootstrap
- jQuery
- JSON
- Agile development
- Node
- OOP
- Express
- MySQL
- Sequelize
- React
- NoSQL
- MERN STACK

Permit Manager

Alan Plummer and Associates - Remote

April 2023 to July 2023

I secured a position with Plummer and Associates following a mass layoff from Sunrun Inc. In this role, I was tasked with tracking and processing commercial permits for underground boring in Denver, CO. Additionally, I was responsible for maintaining relationships with county officials throughout Colorado. Despite settling into the position, I decided to leave in order to pursue further education and embark on a career in web development.

Permit Coordinator

Sunrun - Arvada, CO

January 2022 to March 2023

My daily tasks included record keeping, county building relations, and the acquisition of solar permits in multiple counties, so that our customer could quickly get solar installed on their roofs.

Installer

SunRun Installation Services - Arvada, CO

October 2021 to January 2022

Worked on the install side with sunrun. Daily tasks included the start and completion of installing roof mounted solar systems.

Field Service Technician

Kohnen Concrete Products, Inc. - Germantown, IL

July 2017 to October 2021

My role was to provide good customer service and to maintain the aeration systems on the customers property.

Warehouse Manager

Walmart - Carlyle, IL

June 2015 to June 2017

Lead manager in the warehouse/receiving.

Education

College in Full stack web development

Denver University - Denver, CO

August 2023 to November 2023
